### PROJECT PORTFOLIO

**Project-XXXXXX** Oct 2023

*URL:*

*Languages:*

This application allows..

**Project-Maryze** Aug 2023

*URL:* <https://maryze-t1p2-1c897d7fd819.herokuapp.com/>

*Languages:* JavaScript, Node.js, Mysql2, Sequelize, Express.js

Maryze, a short twist from the term summarize, is a full-stack cover letter generator website developed using the MVC framework. On Maryze, an account owner can create, update and delete cover letters using a pre-populated cover letter template. It also allows account owners to maintain full control over any account settings for information security.

**Project-Krappyak** Jun 2023

*URL:* <https://cqlove.github.io/krappyak/>

*Languages:* HTML, CSS, JavaScript

As a traveler, you may wish to be informed about "destinations' nightmares" to avoid in order to enhance your overall travel experience. Krappyak is a spin-off of kayak and provides the 4 worst places of a chosen category in a given city as ranked in Yelp.
